

# STILL ANOTHER IN THE SERIES: “SHIPWRECKS AND THEIR COINS”

Now **FIVE** Volumes of Text, Tables, Charts, and Graphics  
Focus on What a Collector of Cobs, a Coin Dealer, or a  
Shipwreck Enthusiast Should Know about Wrecks During the  
Age of European Expansion and the Coins that they Yield.

VOLUME FIVE of five, *SHIPWRECKS and THEIR COINS: The 1641 New Spain Fleet “Almiranta”*, is the latest in the series to be released. It is in stock as of the 20th of July, 2012.

A very focused work, this book concerns the history of the huge treasure shipment of 1641 and, especially, the wrecking of *Nuestra Señora de la Pura y Limpia Concepción* on the coral reefs north of Hispaniola, giving the shoals their name: Silver Bank! Included in the work is a brief history of the Spanish New World “coast guard.”

These five “primer-plus” booklets are the product of nearly four decades of diving the wrecks, researching their histories, and studying their treasures. The information gathered—and the silver, gold and copper coins studied—have been described in many articles, books, and magazines, as well as being photographed and sketched by the author, and is now at your fingertips for ready reference ... or for addition to your *CONCEPCIÓN* or general shipwreck library.

In every volume of 48 5.5”x 8.5” pages, you will be exposed to the hardships of the days of sail, the terror of hurricanes and being shipwrecked in a hostile land, and the joy of—today—finding or collecting a piece of this period of history.

Every ship, or fleet of ships, is thoroughly described, down to their names as best as can be determined to date. A relation of their wrecking and the precious cargoes they carried follows, then a detailed study of the coins and their cryptic devices and inscriptions is conducted—accented with an informative array of sketches and photographs.

## NOTE:

Each of these booklets is a stand-alone product, designed as a study guide for ships and coins of a specific shipping tragedy in the Americas ... and elsewhere in the World. Some material in each book is similar to that in the others, though tailored to the title subject, *ESPECIALLY* useful as a “go-with” for that “treasured” coin in your collection!
